PROFESSIONAL EXPERIENCE

Software Development Engineer | Amazon Web Services

June 2024 – Present | San Jose, CA

- Designed and developed **Application Signals Lite** that auto-discovers uninstrumented AWS resources across all service relationship types in 28 regions, eliminating manual instrumentation and unlocking full-stack observability for customers at scale.
- Architected CDK test infrastructure across 28 regions replacing an 11-microservice legacy system that cuts deployment time from **45min to 15 min** and **costs by 65%**, and producing reusable constructs adopted across teams.
- Designed and developed **SLO capabilities for RUM AppMonitors and Synthetics Canaries** in CloudWatch Application Signals, enabling service-level objectives on client-side performance and synthetic availability across all commercial regions.
- Architected the extension of Cloudwatch Application Signals to support government customers by adding federally-required API endpoints, unlocking a new segment of federal users
- Built a **real-time system** that automatically detects and categorizes AWS resource changes during performance incidents, helping customers diagnose issues faster

Software Development Engineer | CURAJOY

Feb 2024 – June 2024 | San Jose, CA

- Developed **personalized activities feature** tailoring therapeutic exercises to individual user needs, boosting engagement by **30%**.
- Integrated **OpenAI's API** for dynamic AI-generated UI content based on user prompts, increasing user interaction by **40%**.
- Enforced best practices around software engineering architecture and processes, including conducting thorough **code reviews** and implementing **unit testing methodologies**.

Software Development Engineer - Intern | Audible Inc. (Amazon)

May 2023 – Aug 2023 | Los Angeles, CA

- Developed UI and backend **RESTful services** to validate audiobook related metadata changes on acx.com dashboard, reducing on-call production incidents by **80%**.
- Designed and developed features for acx.com, enhancing **workflow efficiency** for development teams.
- Built a user-friendly UI to efficiently manage customer requests including **cover art uploads**, music file replacements due to intermittent failures, and overriding audiobook verification status.
- Utilized common object-oriented design patterns such as the **Factory and Strategy patterns** in the backend to make the code extendible.

Software Engineer | Accenture

June 2019 – May 2021 | Bengaluru, India

- Contributed towards design, development, and maintenance of a **real-time event-driven application** to track inventory for fulfillment centers across Canada, increasing system accuracy to **95%**.
- Developed robust **REST APIs and microservices** consumed by inventory management web portals.
- Played a key role in architecting and streamlining an **end-to-end continuous delivery pipeline** enabling one-click build deployments.

SELECTED PROJECT WORK

- MCP AI Agent** — Built next-gen autonomous agents using Model Context Protocol (MCP), enabling multi-step tool integration and reasoning across external services.
- Multimodal AI Assistant** — RAG system supporting text and image retrieval with multimodal embeddings, persistent memory, and corrective RAG for error-resistant pipelines.

TECHNICAL SKILLS

- Languages & Libraries:** Java, Python, REST, JavaScript, TypeScript, PostgreSQL, SQL, Linux
- AI / ML & LLMs:** LLMs, Prompt Engineering, RAG, LangChain, OpenAI/Anthropic APIs, Vector Databases, Agentic Workflows
- Cloud & Tools:** AWS, Spring Boot, Docker, Kafka, Git, Grafana, Splunk, Maven

EDUCATION

California State University - East Bay

Master of Science, Computer Science | GPA: 4.0/4.0

Aug 2022 – Dec 2023 | San Francisco, CA

RNS Institute of Technology

Bachelor of Engineering, Information Science | GPA: 3.9/4.0

Aug 2015 – May 2019 | Bengaluru, India
